

Access to a virtual machine environment for English-speaking students.

Recommended browser: Google Chrome, Microsoft Edge

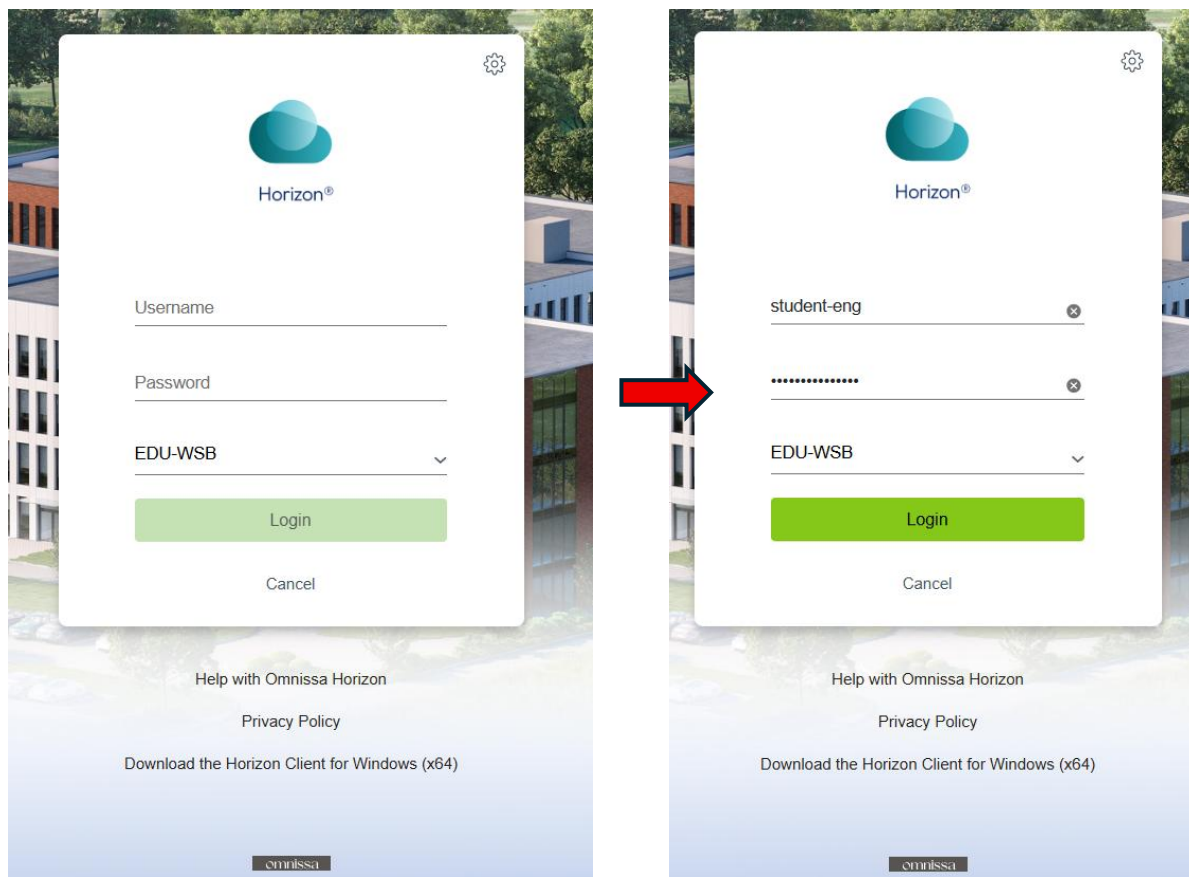

Step 1

Portal address: <https://vlabs.wsb.wroclaw.pl/>

We choose access: Omnisia Horizon Web Client

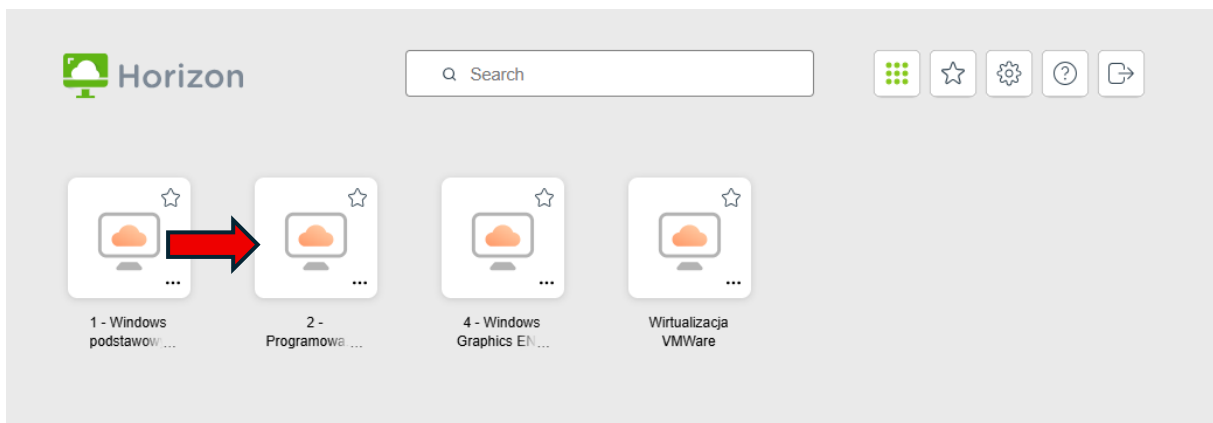

Step 2

In the login window, enter the following data:

- Username: **student-eng**
- password: **Join#Vdi@lab743**

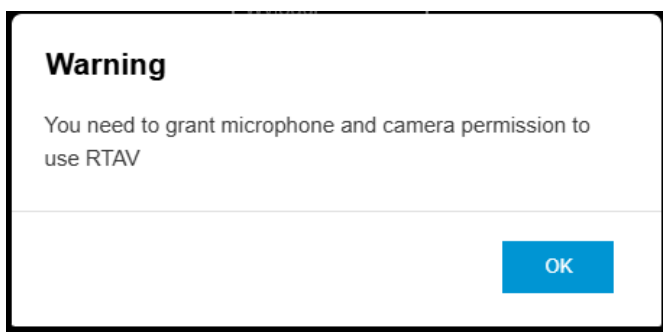

Step 3.

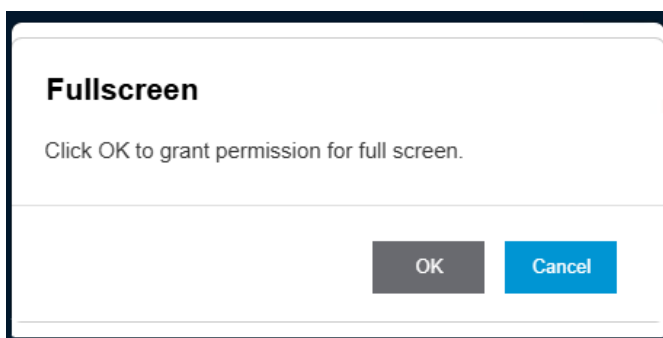

Run by clicking on the computer image named:

2 - Programowanie

When starting the environment, message boxes may appear regarding permission to use the camera/microphone – this is not necessary,

as well as a window with a recommendation to work in full screen – it is worth using for the convenience of work.

We are waiting for the virtual machine to start.

Remarks

All created works and documents should be saved in the selected cloud environment – e.g. OneDrive, Adobe Cloud, or sent to your email account.

Working in a virtual environment is safe, you can log in to your private accounts without any worries – no data will be remembered. Each VM runs as a temporary machine and is completely deleted when the session ends.

If the connection drops, restart the VDI environment and run the same computer pattern – the user session can be maintained for 15 minutes.

When you are fully done, you must log out of the VDI environment.
